E Glass Chopped Strand Mat

Chopped strand mat is a kind of glass fiber non-woven reinforcing material by chopping continuous strands into chopped strands of certain length (50mm) and uniformly in combination with polyester binder in powder or in emulsion form.

Chopped strand mat is suitable for application by hand lay-up, reinforce and machine FRP molding, such as interior decoration of vehicles, boat hulls, sanitary ware, anticorrosive pipes, tanks, building materials, tables, chairs and all kinds of composite FRP products.

Product Characteristics:

1. Even distributing
2. Good wet-out in resins
3. Good overlay capability
4. Excellent mechanical physical and chemical capability.

Product Parameters:

Product code	Glass type	Unite weight (g/m ²)	Width(mm)	Roll weight (kg)	Moisture (%)	Binder content (%)
EMC100	E Glass	100+/-20	200-3200	30-70	<0.2-0.3	2-6
EMC150	E Glass	150+/-20	200-3200	30-70	<0.2-0.3	2-6
EMC200	E Glass	200+/-20	200-3200	30-70	<0.2-0.3	2-6
EMC300	E Glass	300+/-20	200-3200	30-70	<0.2-0.3	2-6
EMC450	E Glass	450+/-20	200-3200	30-70	<0.2-0.3	2-6
EMC600	E Glass	600+/-20	200-3200	30-70	<0.2-0.3	2-6
EMC900	E Glass	900+/-20	200-3200	30-70	<0.2-0.3	2-6
