

E Glass Spray up roving

E glass spray up roving is mainly compatible with reinforced unsaturated Polyester, Vinyl ester resin and Polyurethane resin and so on. It is mostly used to produce FRP boat hulls, safe board, sanitary apparatus and swimming pools etc.

Product Characteristics:

1. Good stiffness and excellent choppability.
2. Good diversion and low static.
3. Excellent lay down property.
4. Fast and complete wet-out in resins good moulding performance.
5. Silane coupling agent.

Product Parameters:

Product code	EW410
Filament diameter(μm)	12
Linear density(Tex)	2400,4800
Moisture content(%)	≤ 0.10
LOI (%)	1.10 ± 0.15
Roll weight(kg)	17 ± 0.5

ISO9001:2008
